Taking part is the most natural thing in the world.

The aim is to listen, get to know each other, start a relationship in order to think of and develop initiatives that have a positive impact in the community.

Right now, it's tough for everyone, but if you're a member of a minority culture sometimes you feel you're not at the right level, you don't know the right people or you don't know how the system works. However the only one who loses out is you (but also a little bit us, because we want to share your dreams)

Oh! But then, if the idea is good, we've got the method to make it happen.

It's the **FLOW©** method Fast Lean Operational Work

A method focused on **strengthening** existing resources, **activating** latent resources and **transforming** limits.

FLOW © is based on the SENSE© approach, oriented to social impact:

- 1.Sustainable:** aims for sustainability with very little impact on investments*
- 2.Ecosystemic:** integrates the project action with the reference ecosystem*
- 3.Non-neutral:** supports initiatives synchronised with ongoing social changes*
- 4.Start-ready:** can enter the micro-macro business cycle at any point*
- 5.Express:** evaluates results after each individual action*
